Annual & Broadleaf Weed Control Upon Germination

# PENSHUI

## HERBICIDE

## Quality Herbicide at a Sharp Price Point

PENSHUI herbicide controls certain annual grass and broadleaf weeds as they germinate, but will not control established weeds. Destroy existing weeds before applying PENSHUI herbicide (except as recommended in specific post-emergence combination treatments or when tankmixed with glyphosate and applied as a pre-emergence treatment). Unusually cold, excessively wet, or hot and dry conditions that delay germination or extend germination over a long period of time can reduce weed control.

**ACTIVE INGREDIENT: Pendimethalin 455g/L**

*Stopping Weeds Early*

## Registered Crops:

- Dry Bulb Onions
- Carrots and Field Carrots
- Field Corn
- Soybeans
- White and Kidney Beans
- Adzuki, Snap and Lima Beans
- Green Onions
- Transplanted Leeks
- Transplanted Green Onions

## Weeds Controlled:

- Barnyard grass
- Crabgrass
- Fall Panicum
- Green Foxtail
- Lamb's quarters
- Redroot Pigweed*
- Yellow Foxtail
- Common Ragweed**
- Smartweed**
- Velvetleaf**
- Old Witchgrass**
- Canada Thistle**
- Corn Spurry**
- Cow Cockle**
- Eastern Black Nightshade**
- Field Bindweed**
- Lady's Thumb**
- Tartary Buckwheat**
- Wild Buckwheat**
- Wild Mustard**
- Wormseed Mustard**

* = **Suppression Only**

** = **With registered tank mix partner**

## Benefits:

- Stops weeds as they emerge in field
- Delivers early residual control of targeted broadleaf and grasses
- Excellent performance
- Microcapsule suspension formulation
- Great formulation with low odor for ease of use

Strong Annual Grass Control
